MOUNTING  
TECHNOLOGIES

# FLAT DIRECT

NON-INVASIVE. PITCHED.  
UNRIVALED.

PRODUCT OVERVIEW

**PITCHED ROOF MOUNTING SYSTEM**

# WE THE PMT

PREMIUM  
MOUNTING  
TECHNOLOGIES

Premium mounting Technologies GmbH & Co.KG is a young, innovative and continuously growing company, which acts very close to the market's demands, due to more than 15 years of experience.

We offer revolutionary mounting systems for flat and pitched roofs with up to now unachieved performance in safety and quality.

Our Carport products combine economics and cost-efficiency in an aesthetic way which is unbeatable in the market.

Without exceptions - all products are tested by means of wind tunnel, component testing and theoretical calculation. On top all products are tested in real life by selected installation services, critically inspected, optimized and further developed continuously. This guarantees our partners a high degree of innovation and safety, a maximum of practice suitability and the certainty to get market orientated and optimized solutions in times of continuously changing industry requirements. We are always driven by the standard for highest quality, highest possible reliability and a maximum of proximity to our partner and their projects.

# YOUR DEMANDS OUR SOLUTIONS

## SAFETY

- Absolute legal safety due to the National Technical Approval
- 20 years insurance cover and warranty with PMT PROOF
- Maximum safety standard of our products verified by certificates

## SIMPLICITY

- Easy assembly due to non-interchangeable connections
- Professional support of your projects by trained staff
- Extensive accessories solutions from one hand

## EFFICIENCY

- Shortest mounting time thanks to patented click-connections
- Cost effectiveness by low BOS costs and short project time
- Worldwide access to the planning data for the project team

## QUALITY

- Highest demand of quality for our products
- Certification of assembly teams for competent installations

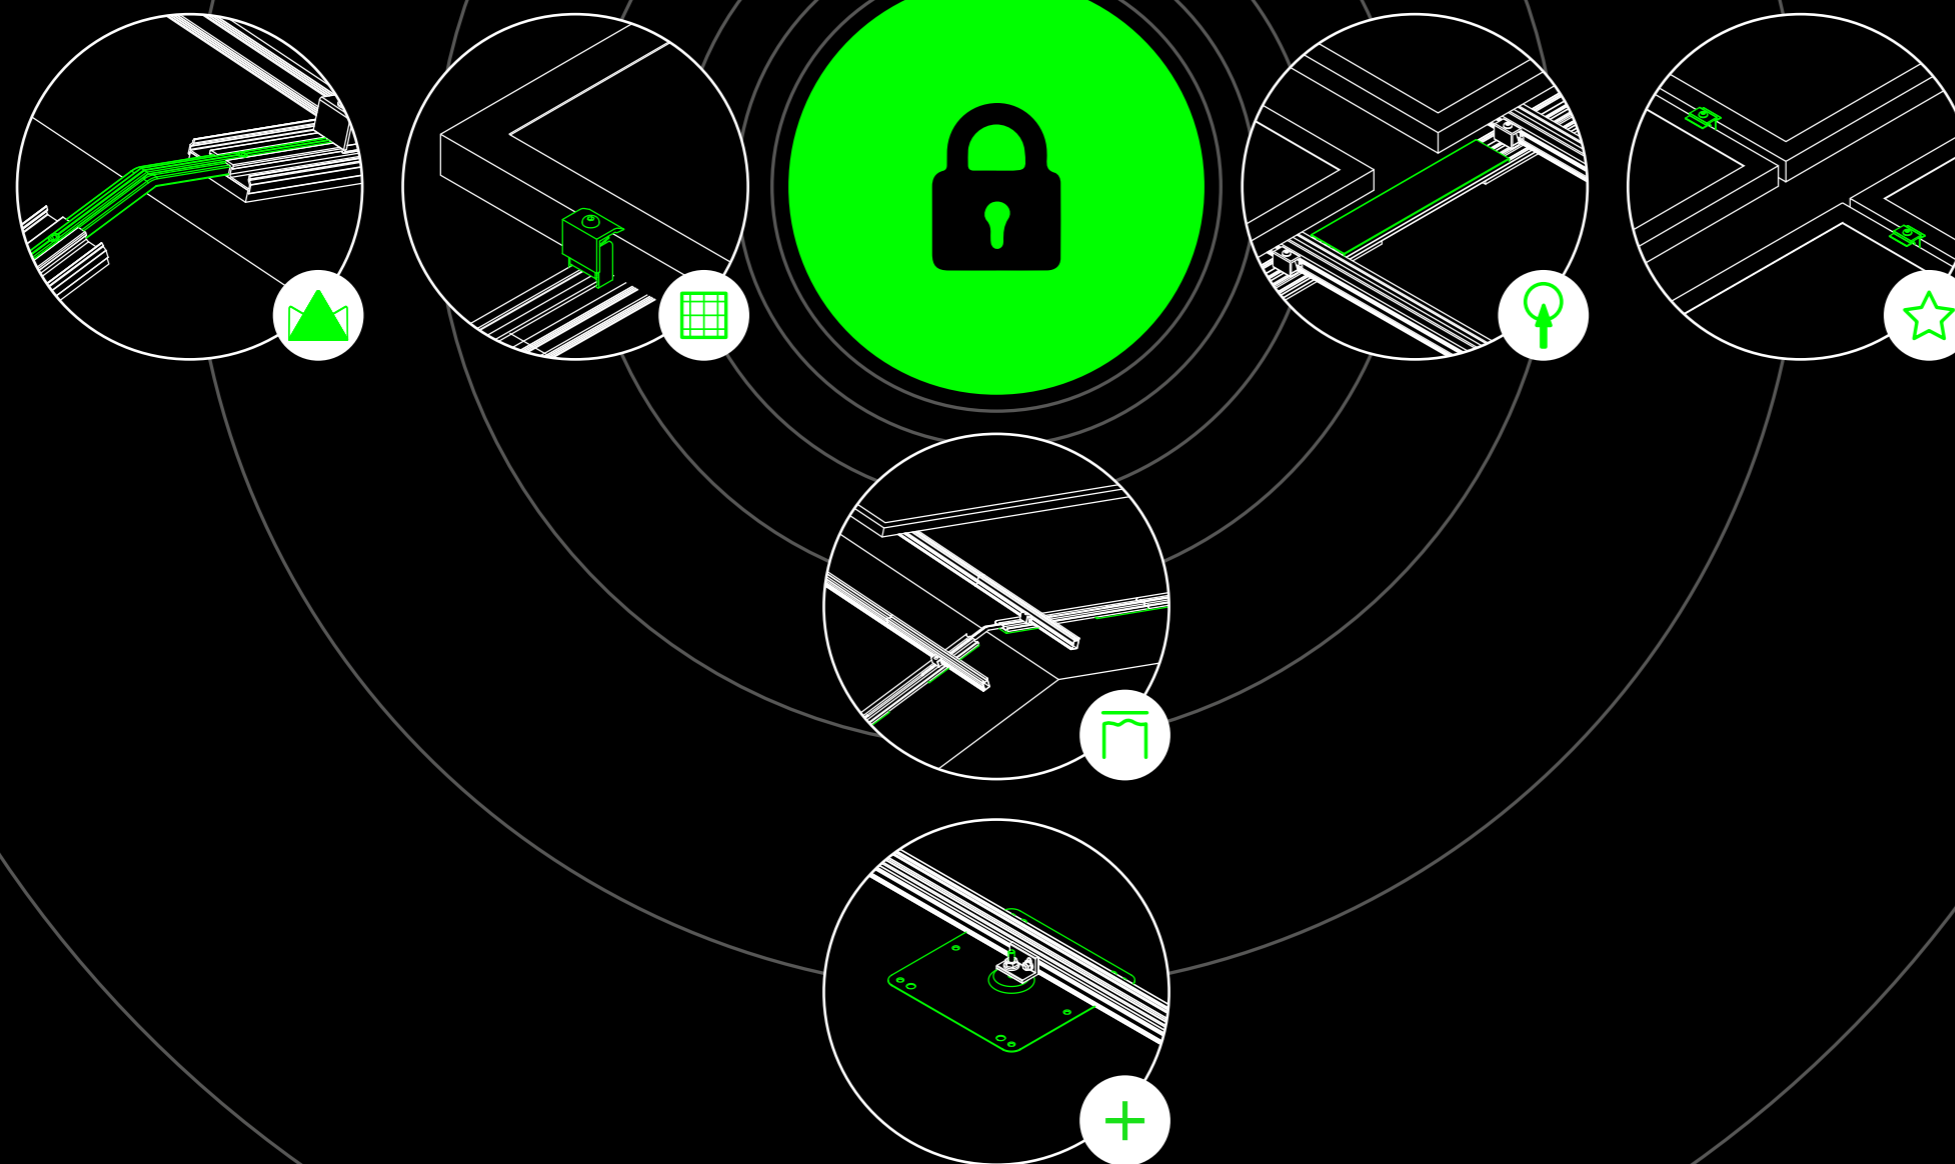

PMT turns safety into standard.

# FLAT DIRECT FEATURES

The Flat Direct impresses by its widespread range of applications and offers possibilities of use in an up-to-now undeveloped roof segment. Whether pitched, pent, SHED, or butterfly roofs clad with foil, bitumen or sandwich panels: the Flat Direct gives you maximum safety and is always the optimum penetrating-free solution for roof inclinations of up to 30°.

Let yourself be convinced!

## **BALLAST OPTIMIZED**

- Verification by means of WTG wind tunnel statement
- Ballast fixing with universal module clamps

## **VARIABLE RANGE OF APPLICATIONS**

- Penetrating-free mounting possible
- Pitched, pent, SHED, barrel, and butterfly roofs
- Ridge joint, ridge coupling, ridge coupling with compensating ballast

## **MODULE INSTALLATION GUIDELINES**

- Compliance with module clamping ranges for the best-selling modules
- Clearing of the module drainage holes
- Optional: low-resistance module earthing

## **IDEAL CABLE ROUTING**

- Integrated cable duct cover

## **UNIVERSAL MODULE CLAMP**

- Universal clamp from 30 to 50 mm module frame height
- Releasable and reusable

## **OPTIMUM CONTACT SURFACE**

- Continuous ground rail of 80 mm width
- High-Tec protective mat without plasticizer migration
- Roof-drainage guaranteed

## **EXTENSIVE ACCESSORIES**

- Inverted convertor bank
- Roof fastening points
